

Connect emission-free power to the grid?

Naturally.

ABB is a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impact. The ABB Group of companies operates in around 100 countries and employs about 120,000 people. ABB is the world's largest supplier of electrical products and services to wind turbine manufacturers, with a portfolio ranging from generators to compact substations to grid connections.

Power and productivity
for a better world™ **ABB**

Fast track technology that you
can rely on in any situation?

Absolutely.

ABB provides a total global service for high performance electrical equipment for on-line and in-vehicle applications. We work closely with utility and power distribution companies as well as rail network operators and OEMs to deliver energy efficient solutions that ensure optimal power availability and precise, reliable control and communications. Our track record includes high speed, regional rail and metro links across the world. www.abb.com/railway
