

## BIMINI POWER IN 60 SECONDS... YES, INDEED!

Our range of powered Bimini units are ideally suited for providing enhanced sun protection and comfort over the flybridge or cockpit of luxury yachts and powerboats.

Created from high quality stainless steel, the robust hydraulic motor and actuators are available in two sizes and include a universal

mounting system that allows the unit to be installed easily on any boat, new or old.

Deployed by one person, at the press of a button and in a matter of 60 seconds, the Bimini system can remain upright when cruising at up to 35 knots!

Makefast Ltd is one of the UK's leading manufacturers of manual and electric sliding roof systems for the luxury yacht market.
